| Who we are

- ✧ We are the leading enterprise in China Pet Food Industry.
- ✧ We are the first public offering by an SME in China Pet Food Industry.

- Our Philosophy

Pets are our friends and part of our family.

- Our Mission

To develop and grow the well-being of the China pet industry.

- Our Vision

To be the leading enterprise in global pet food industry.

- Core Values

▪ Customer ▪ Quality Innovation ▪ Responsibility

// Chairman's Statement

Dear friends,

It is our sincere pleasure to be granted the opportunity to "Meet" here.

"Wanpy means chicken jerky, and chicken jerky means Wanpy" is the industry story created by the architect of China pet treats: Yantai China Pet Foods Group.

Core values that Wanpy has always been guided by during the growth of the enterprise, are "Industry prosperity ahead of individual brilliance, and social value ahead of commercial wealth".

Throughout the years, we evolved from being a manufacturer solely processing to a brand owner with independent innovation, as well as

from a nascent industry player to an industry leader. "The global shares same quality" is the business' philosophy and objective that we will strive for eternally!

The health of your pets is our main priority and the foundation for our products. "Pets are our friends and part of our family". Keeping this concept in mind from R & D to production, we are committed to providing nutritious, healthy and safe food to our beloved pets, which will contribute to a long-lived, healthy and happy life!

We consider every advancement of Yantai Pet Foods Group as the affirmation from pet owners to us. Moving forward, we will remain grateful for every step, and aspire to become the trusted choice of more pet owners and trusted partner of more pets.

Milestones

R & D

Yantai China Pet Foods owns the most advanced R&D center that focuses on new product research, pet nutrition and health research, including a new product R&D center, a pet nutrition and health research institute as well as a testing center of the highest standard in China pet industry. The test center has been certified by ILAC - MRA/CNAS. The pet nutrition and

health research institute covers 12,000 square meters, including test area, breeding area, office and outdoor activity area. Currently, the institute raises over 30 varieties with more than 300 dogs and cats.

The company owns a professional R&D team specialized in food, veterinarian, animal health and nutrition, and also invited experts to join in as consultants from the United States, Germany, Canada, New Zealand and China. The company has been awarded with 283 national patents, which include 20 national patents for invention.

12000 m²

283 National Patents

81 R&D Engineers

Quality control

The company has established a strict pet food safety and quality management system. We strictly control the quality throughout the entire production process, from the raw materials to the production, and to the finished products; all processes are closely monitored. All of our animal raw materials are from large-scale slaughter companies that meet the human consumption standards. The animal breeding process strictly abides by the "five unification" breeding management model from seedling, incubation, breeding, feed and medication. The quality and safety of the entire product chain are carefully controlled, the hygiene indicators meet the high international standards, and importing meets the requirements of the USA, EU, etc.

We comply with "The traceability system" and "Defect product recall system", which achieves the two-way traceability from the finished product to the raw material.
